A comparison of the sector financial accounts of six of the member countries of the European Community

ARTIKLER – ARTICLES – ARTICOLI 83

Manuskript afsluttet den 26. november 1979

Manuscript completed 26 November 1979

Manoscritto terminato il 22 novembre 1979

Arbejdsløshed: fornyet stigning

Oktober måned kendetegnedes ved en fornyet stigning i arbejdsløsheden i hele Fællesskabet (+1,0% i sæsonkorrigerede tal), mens man i de foregående måneder havde kunnet konstatere en vis stabilisering. En sammenligning med situationen for et år siden kaster ikke noget lys over den grundlæggende udvikling i Fællesskabet som helhed, idet der her kun er tale om 47 000 arbejdsløse færre, hvilket er en nedgang på 0,8%. Dette fællesskabstal dækker imidlertid over meget forskellige nationale udviklinger. Mens der i forhold til situationen for et år siden ikke er sket nogen nævneværdig ændring i Nederlandene, er arbejdsløsheden faldet i Danmark (-29,4%), Forbundsrepublikken Tyskland (-15,5%), Irland (-9,8%) og Det forenede Kongerige (-4,3%), og til gengæld er den steget i Luxembourg (+10,4%), Frankrig (+10,1%), Belgien (+5,4%) og Italien (+3,8%). Denne udvikling afspejler en tendens, som man i mindst et år har kunnet konstatere i disse lande (se den grafiske fremstilling på side D).

Industriproduktionen: første tegn på en afmatning af industriproduktionen

Det sæsonkorrigerede indeks for Fællesskabets industriproduktion er foreløbigt anslået til 116,2 for august måned 1979, hvilket er 1,3% under tallet for juli måned. Det er fjerde gang i løbet af de seneste fem måneder, at der registreres månedlige negative ændringer i det sæsonkorrigerede indeks, hvilket leder tanken hen på, at de foregående måneders ekspansionstendenser ikke holder stik. Dette bekræftes af den nedgang, der siden juni 1979 har været i industriproduktionen på kort sigt. De relativt optimistiske tal i andet kvartal var til en vis grad overvurderet som følge af den lave produktion i januar, men i juli og august talte denne faktor ikke længere med ved beregningen af væksten på kort sigt. Man kan derfor antage, at tallene for de seneste måneder i højere grad viser de underliggende tendenser.

Stigningen i konjunkturindikatorerne for produktionen af investerings- og forbrugsgoder i Fællesskabet, som viser udviklingen i indekset for hele industrien, er faldet betydeligt i de seneste 3 måneder. Imidlertid har afmatningen været langt mindre markant for sektoren for mellemprodukter. I medlemslandene har den kortsigtede vækst udviklet sig i negativ retning i de seneste måneder i Det forenede Kongerige, Italien, Forbundsrepublikken Tyskland, Belgien, Luxembourg og Danmark, mens udviklingen har været usikker i Nederlandene. I Frankrig derimod har man i juli og august kunnet konstatere en lille fremgang i væksten på kort sigt. Denne fremgang skyldes til dels, at man er begyndt at sprede ferierne inden for automobilindustrien, hvilket har bevirket, at man har kunnet opretholde en konstant produktion i denne franske nøgleindustri.

Energi: stigning inden for kulindustrien

For første gang i femten år karakteriseres kulindustrien dels ved en stigning i produktionen af kul og dels ved en formindskelse af minernes lagre.

I løbet af de første seks måneder af 1979 nåede fællesskabsproduktionen af kul op på 123 Mio tons, hvilket svarer til en stigning på 1,1% i forhold til de første seks måneder af 1978. Denne ganske vist lille stigning skyldes hovedsagelig en forøgelse af kuludvindingen i Forbundsrepublikken Tyskland (+5%), mens de andre lande med undtagelse af Det forenede Kongerige på deres side har formindsket nedgangen i produktionen. De samlede fællesskabslagre er faldet en lille smule (-0,4%) med undtagelse af de tyske lagre, som er steget med næsten 1 Mio tons, og som nu udgør 45% af Fællesskabets lagre.

Importen af kul fra tredjelande er i modsætning til 1978 igen stigende, idet der har været en forøgelse på næsten 3 Mio tons (i forhold til de første 6 måneder af 1978), hvoraf mere end halvdelen var til Belgien. Leverancerne til el-værkerne er fortsat steget konstant, og leverancerne til koksværkerne har for første gang i 5 år udvist en betydelig stigning (+4,6% mod -6,7% for 1978) parallelt med opsvinget i jern- og stålindustrien.

Man kan således, hvad højovnskoks angår, konstatere dels en stigning i produktionen i næsten alle landene og dels en nedgang i koksværkernes lagre, hvilket står i forbindelse med den øgede efterspørgsel fra jern- og stålindustrien.

Samhandlen inden for fællesskabet: stærkt stigende samhandel

I sæsonkorrigerede tal baløb handlen mellem medlemslandene (baseret på importen) sig i august måned til 18,8 Mrd ERE, hvilket er en lille nedgang (0,7%) i forhold til den foregående måned. I forhold til den tilsvarende måned året i forvejen kan man imidlertid notere en meget betydelig stigning på 25,8%.

I de 8 første måneder af 1979 beløb samhandlen inden for Fællesskabet sig i markedspriser til 141,3 Mrd ERE. Den store stigning på 19,7% i forhold til den samme periode året i forvejen kan især henføres til Italien og Det forenede Kongerige. Disse to lande har øget deres eksport til de øvrige medlemslande med henholdsvis 28,8% og 26,8%. Stigningen i BLØU's handel med EF-partnerne var langt mere moderat (import: +8,8%, eksport: +15,5%).

Fællesskabets samhandel med tredjelande: fortsat forværring af handelsbalancen

På grund af sæsonmæssige variationer er Fællesskabets import fra tredjelande steget med 8,8% i forhold til juli måned og når således op på 18,7 Mrd ERE. Samtidig er eksporten steget med 6,2% og udgør således 17,5 Mrd ERE. Stigningen i forhold til august måned 1978 er for importens vedkommende 27,4% og for eksportens vedkommende 22,0%.

Den samlede import i de 8 første måneder af 1979 udgjorde i markedspriser 135,7 Mrd ERE (+17,6% i forhold til januar-august 1978), og den samlede eksport udgjorde 125,2 Mrd ERE (+12,2%). Den stærkeste stigning registreres i Italien (import: +24,7%, eksport: +25,3%). Forbundsrepublikken Tysklands eksport steg yderligere med 9,2%, men importen med 21,3%. Dette har reduceret Forbundsrepublikken Tysklands handelsbalanceoverskud med 3,0 Mrd ERE, og den er nu på 4,8 Mrd ERE. De øvrige medlemslandes underskud er vokset.

For hele Fællesskabets vedkommende er olieprisstigningerne en stor del af forklaringen på underskuddet på 1,3 Mrd ERE i august måned 1979. For perioden januar-august er handelsbalancen med tredjelandene ligeledes negativ, idet den er på -10,5 Mrd ERE, hvilket er en betydelig stigning i forhold til underskuddet på -3,8 Mrd ERE i den tilsvarende periode i 1978.

Forbrugerpriser

Forbrugerprisindekset for alle EF-landene steg med 1,1% fra september til oktober 1979.

Den stærkeste stigning registreredes i Italien (2,3%).

Der registreres ligeledes en betydelig stigning i Det forenede Kongerige (0,9%). I Benelux-landene og i Danmark registreres moderate stigninger på fra 0,5 til 0,7%, mens indekset for Forbundsrepublikken Tyskland kun er steget 0,3%.

For EUR 9 er priserne steget med 12,0% i forhold til oktober 1978. Af medlemslandene har fire lande (Nederlandene, Belgien, Luxembourg og Forbundsrepublikken Tyskland) i den samme periode haft en stigningstakt på tæt ved 5%, Frankrig og Danmark ligger tæt på EF-gennemsnittet, mens Det forenede Kongerige og Italien har stigningstakter på tæt ved 17%.

Penge og finanser: fortsat stigende rentesatser

Den tyske Bundesbank besluttede at hæve diskontoen fra 5 til 6% fra den 1. november. Dette skridt blev øjeblikkeligt fulgt op af Nederland'sche Bank, som forhøjede sin diskonto med $\frac{1}{2}$ procentpoint til 8,5%. Uden for Fællesskabet fulgte Japan og Schweiz ligeledes dette skridt. Den globale tendens til højere renter, som konstateredes midt på året, synes dermed bekræftet, og der er ingen tegn på en pludselig ændring af denne tendens, især ikke efter at det af amerikanske regeringskredse er blevet gjort klart, at man vil føre en restriktiv pengepolitik. På det amerikanske lånemarked er »prime rate« (udlånsrenten til førsteklases debitorer) for en af de største banker nået op på rekordhøjen 15,5%.

Unemployment : resumption of growth

In October the growth of unemployment at Community level resumed (+1.0% after seasonal adjustment) whereas a certain levelling-out had been apparent in the preceding months. A comparison with the situation twelve months before does not reveal any basic change for the Community as a whole, which had only 47 000 fewer unemployed, i.e. a reduction of 0.8%. This position at Community level, however, obscures a much greater degree of change in the various Community countries. While there was no marked change as compared with the situation a year before in the Netherlands, unemployment had fallen in Denmark (-29.4%), the F.R. of Germany (-15.5%), Ireland (-9.8%) and the United Kingdom (-4.3%) while it had increased in Luxembourg (+10.4%), France (+10.1%), Belgium (+5.4%) and Italy (+3.8%). These changes reflect a tendency which has been apparent in each of the countries for at least one year (see graph on page D).

Industrial production : early signs of a slow down in industrial production growth

The seasonally adjusted Community index of industrial production is estimated provisionally to be 116.2 for the month of August 1979, a figure 1.3% lower than that registered in July. This is the fourth time in the last five months that negative monthly changes in the seasonally adjusted index have been recorded, suggesting that the expansionary momentum of earlier months has now been dissipated. Turning to short-term industrial production trends, it is clear that there has been a deceleration in growth since June 1979. The relatively buoyant figures in the second quarter were exaggerated to some extent by the low level of Community production in January, but in July and August this factor was no longer relevant for short-term trend calculations. As a result, it can be hypothesised that the latest months' figures are more indicative of underlying trends since special factors ceased to influence the results.

Reflecting the developments in the total industry index, the short-term trend rates of growth in the Community's investment and consumer goods industries have fallen quite sharply in the last three months. However in the intermediate goods sector the drop in growth has been much less marked. At the member state level, short-term rates of growth have been moving in an unfavourable direction over the last few months in the United Kingdom, Italy, Germany, Belgium, Luxembourg and Denmark and have moved uncertainly in the Netherlands. By contrast, there was some improvement in the short-term rate of growth in France in July and August. This was due in large measure to the introduction of staggered holidays in the automobile industry, which enabled continuous production to be maintained in this key branch of the French economy.

Energy : recovery in the coal sector

For the first time in fifteen years, the coal sector was characterized by a rise in hard coal production and at the same time a drop in pithead stocks.

In the 1st half of 1979 Community hard coal production amounted to 123 million tonnes, 1.1% more than in the 1st half of 1978. This increase, which is only slight, is largely accounted for by the rise in coal production in the F.R. of Germany (+5.0%), while the other countries, with the exception of the United Kingdom, reduced the rate at which their production was declining.

Total pithead stocks in the Community as a whole dropped slightly (-0.4%) with the exception of German stocks, which increased by almost half a million tonnes and which now account for 45% of the Community's stocks. The trend observed in 1978 for coal imports from third countries was reversed, with an increase of almost 3 million tonnes (as compared with the 1st half of 1978, of which more than half was for Belgium).

Deliveries to power stations continued to expand steadily; for the first time in five years deliveries to coking plants rose appreciably (+4.6% as opposed to -6.7% in 1978), reflecting to recovery of the steel industry.

In consequence, hard coke production increased in almost all the Community countries and at the same time stocks held at coking plants fell as a result of increased demand from the steel industry.

Intra-Community trade : substantial increase

Seasonally adjusted trade among the Member States (based on import data) was 18 800 million EUA in August, a level slightly lower (0.7%) than in the previous month. As compared with the corresponding month of the previous year, however, there was a very marked increase of 25.8%.

In the first eight months of this year, trade within the Community at current values reached 141 300 million EUA. The sharp increase of 19.7% as compared with the same period of the previous year was largely accounted for by Italy and the United Kingdom. These two countries increased their purchases from other Member States by 28.8% and 26.8% respectively. The increase in trade between the BLEU and the other Community countries was fairly modest (imports +8.8%, exports +5.5%).

External trade of the Community : continuing deterioration of the balance of trade

As a result of seasonal fluctuations, Community imports from third countries increased by 8.8% as compared with July, reaching a level of 18 700 million EUA. At the same time, exports increased by 6.2% to 17 500 million EUA. The rates of increase as compared with August 1978 are 27.4% for imports and 22% for exports.

At current values, total imports for the first eight months of 1979 reached 135 700 million EUA (17.6% higher than for January-August 1978) while total exports were 125 200 million EUA (+12.2%). The sharpest increase was for Italy (imports +24.7%, exports +25.3%). German exports further increased by 9.2%, but imports rose by 21.3%. This resulted in a reduction of 3 000 million EUA in the German trade surplus, which is now 4 800 million EUA. The deficit of all the other Member States has increased.

The deficit of 1 300 million EUA in August 1979 for the Community as a whole is largely explained by the increase in oil prices. Over the period from January to August, the balance of trade with third countries was also negative with a deficit of 10 500 million EUA, which was substantially larger than that of 3 800 million EUA for the corresponding period of 1978.

Prices

The index of consumer prices for the whole of the Community rose by 1.1% between September and October 1979.

The sharpest rise occurred in Italy (2.3%).

A considerable increase was also recorded for the United Kingdom (0.9%).

In the Benelux countries and Denmark there were modest increases of 0.5 to 0.7% while the index for the F.R. of Germany increased by only 0.3%.

The prices for EUR 9 were 12.0% higher than in October 1978. Of the Member States, four countries (the Netherlands, Belgium, Luxembourg, Germany) had a rate of increase of about 5% for the same period, France and Denmark were close to the Community average and the United Kingdom and Italy registered increases in the vicinity of 17%.

Finance : continuation of the upward movement of interest rates

The Bundesbank decided to raise its discount rate from 5 to 6% as from 1 November. This step was immediately followed by the Nederlandse Bank, which increased its rate by half a point to 8.5%. Outside the Community, Japan and Switzerland also adopted the same policy. The world trend towards higher interest rates which has been apparent since the middle of this year is thus confirmed and there are no signs of a sudden reversal of this tendency, especially as statements from government circles in the United States indicate that a restrictive monetary policy will continue to be pursued. On the American credit market, the "prime rate" (rate granted to the most important customers) of one of the most important banks has reached the record level of 15.5%.

Disoccupazione : ripresa dell'andamento ascendente

Il mese di ottobre è stato caratterizzato da una ripresa dell'aumento della disoccupazione su scala comunitaria (+1,0% sulla scorta dei dati corretti delle variazioni stagionali), mentre nei mesi precedenti si era potuta osservare una certa stabilizzazione. Il raffronto con la situazione di dodici mesi fa non evidenzia, per il complesso della Comunità, alcuna evoluzione fondamentale: il numero dei disoccupati risulta diminuito di sole 47 000 unità, pari ad una riduzione dello 0,8%. Questa situazione globale nasconde tuttavia evoluzioni assai più differenziate sul piano nazionale: se, rispetto a un anno fa, non si osservano variazioni di rilievo nei Paesi Bassi, la disoccupazione risulta invece diminuita in Danimarca (-29,4%), nella Repubblica federale di Germania (-15,5%), in Irlanda (-9,8%) e nel Regno Unito (-4,3%), e aumentata per contro nel Lussemburgo (+10,4%), in Francia (+10,1%), in Belgio (+5,4%) e in Italia (+3,8%). Queste diverse evoluzioni segnano tendenze che, a livello dei singoli paesi considerati, persistono da almeno un anno (vedi grafico pagina D).

Produzione industriale : primi segni di flessione

L'indice comunitario della produzione industriale, corretto delle variazioni stagionali, è provvisoriamente stimato a 116,2 per il mese d'agosto 1979: questa cifra è inferiore dell'1,3% al dato di luglio. Per la quarta volta negli ultimi cinque mesi si osservano variazioni mensili negative dell'indice destagionalizzato, il che fa pensare che la tendenza all'espansione dei mesi precedenti si sia ormai esaurita. Questo fatto è confermato dalla decelerazione del tasso di sviluppo a breve termine della produzione industriale che si osserva dal giugno 1979. I tassi relativamente ottimisti del secondo trimestre erano infatti sovrastimati, in una certa misura, a causa del basso livello della produzione comunitaria nel mese di gennaio, ma in luglio e in agosto questo fattore non interviene più per i calcoli dei tassi di sviluppo a breve termine e si può pertanto presumere che le cifre di questi ultimi mesi traducano più correttamente le tendenze soggiacenti.

Riflettendo l'evoluzione dell'indice per il complesso dell'industria, sono diminuiti notevolmente negli ultimi tre mesi anche i tassi di sviluppo degli indicatori congiunturali nelle industrie della Comunità produttrici di beni d'investimento e di beni di consumo. Tuttavia, nel settore dei beni intermedi la flessione dello sviluppo è stata assai meno accentuata. Se si analizza la situazione dei singoli Stati membri, si osserva che i tassi di sviluppo a breve termine hanno avuto negli ultimi mesi un andamento negativo nel Regno Unito, in Italia, in Germania, in Belgio, nel Lussemburgo e in Danimarca, mentre l'evoluzione appare incerta nei Paesi Bassi. In Francia si è invece constatato in luglio e in agosto un lieve miglioramento dello sviluppo a breve termine, dovuto in parte ai provvedimenti presi nell'industria automobilistica per ripartire le ferie sull'intero arco dell'anno, i quali hanno permesso di mantenere una produzione continua in tale settore chiave dell'industria francese.

Energia : ripresa dell'attività carboniera

Per la prima volta da quindici anni l'attività carboniera è stata caratterizzata sia da un aumento della produzione di carbone, sia da una diminuzione del volume delle scorte presso le miniere.

Nel primo semestre del 1979 la produzione comunitaria di carbon fossile ha raggiunto il volume di 123 milioni di tonnellate, segnando un aumento dell'1,1% rispetto al primo semestre del 1978. Tale incremento, sia pure non molto rilevante, è dovuto soprattutto allo sviluppo dell'estrazione di carbone nella Repubblica federale di Germania (+5%), mentre gli altri paesi (escluso il Regno Unito) hanno soltanto rallentato la diminuzione della loro produzione. Il volume delle scorte totali presso le miniere di carbone nella Comunità ha segnato una diminuzione di lieve entità (-0,4%), con una eccezione per le scorte tedesche, aumentate di quasi 1 milione di tonnellate e pari ormai al 45% delle scorte dell'intera Comunità.

Le importazioni di carbone dai paesi terzi hanno, contrariamente alla tendenza osservata nel 1978, registrato nuovamente un aumento, pari a circa 3 milioni di tonnellate (rispetto al primo semestre del 1978) e destinato per oltre la metà al Belgio.

Le forniture alle centrali elettriche hanno continuato ad aumentare ad un ritmo sostenuto; d'altra parte, con la ripresa delle attività nell'industria siderurgica, le forniture alle cokerie sono state, per la prima volta da cinque anni a questa parte, in sensibile aumento (+4,6%, contro -6,7% per il 1978).

Per il coke metallurgico si osserva quindi, in seguito allo sviluppo della domanda dell'industria siderurgica, un aumento della produzione in quasi tutti i paesi e una diminuzione delle scorte nelle cokerie.

Commercio intracomunitario : forte sviluppo degli scambi

Il commercio tra gli Stati membri, valutato sulla base delle importazioni, è ammontato nel mese di agosto a 18,8 miliardi di UCE (dato destagionalizzato), valore che rappresenta un lieve rallentamento (-0,7%) sul mese di luglio, ma pur sempre un aumento molto rilevante (+25,8%) rispetto al mese corrispondente dell'anno scorso.

Nei primi otto mesi di quest'anno gli scambi intracomunitari, in valori correnti, sono ammontati a 141,3 miliardi di UCE. Il sensibile aumento (+19,7%) rispetto allo stesso periodo dell'anno scorso è dovuto soprattutto all'Italia e al Regno Unito, che hanno aumentato i loro acquisti presso gli altri Stati membri nella misura del 28,8% e, rispettivamente, 26,8%. L'aumento degli scambi dell'UEBL con gli altri paesi della Comunità è stato invece piuttosto moderato (importazioni +8,8%; esportazioni +15,5%).

Commercio estero della comunità : continuo peggioramento della bilancia commerciale

Per motivi di carattere stagionale nell'agosto del 1979, le importazioni della Comunità dai paesi terzi sono aumentate dell'8,8% rispetto al mese di luglio, raggiungendo così il livello di 18,7 miliardi di UCE. Parallelamente, le esportazioni aumentavano del 6,2%, arrivando a 17,5 miliardi di UCE. I tassi d'incremento rispetto all'agosto del 1978 sono del 27,4% per le importazioni e del 22,0% per le esportazioni.

In valori correnti, la somma delle importazioni per i primi 8 mesi del 1979 ammonta a 135,7 miliardi di UCE (+17,6% rispetto al periodo gennaio-agosto 1978), quella delle esportazioni a 125,2 miliardi di UCE (+12,2%). L'incremento maggiore si registra per l'Italia (importazioni +24,7%; esportazioni +25,3%). Per la Germania le esportazioni sono aumentate ancora del 9,2%, ma le importazioni hanno registrato un balzo del 21,3%: ciò ha ridotto di 3,0 miliardi di UCE l'eccedenza della bilancia commerciale tedesca, pari ormai a 4,8 miliardi di UCE. È aumentato d'altra parte il disavanzo di tutti gli altri paesi membri.

Per il complesso della Comunità, l'aumento dei prezzi del petrolio spiega in gran parte il disavanzo del mese d'agosto 1979, pari a 1,3 miliardi di UCE. Il saldo del commercio con i paesi terzi risulta negativo anche per l'intero periodo gennaio-agosto, ammontando a -10,5 miliardi di UCE, il che corrisponde ad un forte aggravamento rispetto al deficit di 3,8 miliardi di UCE del corrispondente periodo del 1978.

Prezzi

L'indice dei prezzi al consumo per il complesso dei paesi della CE è salito dell'1,1% tra il mese di settembre e quello di ottobre 1979.

L'aumento più forte si è avuto in Italia (2,3%), ma anche il Regno Unito accusa un aumento rilevante (0,9%). I paesi del Benelux e la Danimarca registrano invece tassi di aumento moderati, compresi tra lo 0,5 e lo 0,7%, mentre l'indice della Repubblica federale di Germania è salito soltanto dello 0,3%.

Per il complesso EUR 9, i prezzi sono saliti mediamente del 12% rispetto all'ottobre del 1978. Quattro paesi membri (Paesi Bassi, Belgio, Lussemburgo, Germania) accusano per tale periodo tassi d'incremento vicini al 5%, mentre Francia e Danimarca si situano intorno alla media comunitaria e Regno Unito ed Italia sono a livelli vicini al 17%.

Finanze : persistente aumento dei tassi d'interesse

La Bundesbank ha deciso di portare il suo tasso di sconto dal 5 al 6% a decorrere dal 1° novembre; a questa decisione ha fatto immediatamente seguito la decisione analoga della Nederlandsche Bank, che ha aumentato il proprio tasso di un mezzo punto, portandolo all'8,5%. Al di fuori della Comunità, anche il Giappone e la Svizzera hanno seguito questo movimento. Si trova così confermata la tendenza mondiale all'aumento dei tassi d'interesse che si osserva dalla metà di quest'anno, senza che esista alcun segno in grado di preannunciare una rapida inversione di tendenza del movimento, soprattutto da quando le dichiarazioni degli ambienti governativi statunitensi hanno annunciato l'intenzione di mantenere una politica monetaria restrittiva. Sul mercato americano del credito il « prime rate » (tasso d'interesse praticato per i maggiori clienti) di una delle maggiori banche ha raggiunto il livello record del 15,5%.

FORORD

DA

Denne publikation omfatter to dele: den ene indeholder »fællesskabstabeller« og den anden »tabeller efter lande«.

I »fællesskabstabellerne« er samlet de vigtigste indikatorer for Fællesskabets og for hver medlemsstats økonomiske udvikling på kort sigt, uddybet med nogle strukturelle oplysninger for året 1975. Denne del, som skal muliggøre sammenligninger mellem landene, indeholder der for kun af EUROSTAT harmoniserede tal, på grundlag af fælles kriterier, hvilket forklarer visse uoverensstemmelser med de nationale tal.

Rækkerne er korrigerede for sæsonvariationer ved hjælp af EUROSTAT's »Dainties«-metode. **De mest aktuelle tal er foreløbige og i visse tilfælde direkte skønnede af EUROSTAT.**

Som indikator for verdenskonjunkturudviklingen indeholder »fællesskabstabellerne« en søjle for USA.

I »tabellerne efter lande« er for hvert land udvalgt de for det pågældende land mest anvendte konjunkturrelle indikatorer; det drejer sig om nationale rækker, i overensstemmelse med nationale kriterier og sæsonkorrigerede efter nationale metoder. I denne del er der ud

over Fællesskabets ni medlemslande medtaget kandidatlandene Spanien, Grækenland og Portugal, såvel som USA og Japan.

For alle rækkerne findes de historiske tal (årlige, kvartals- og månedstal) i EUROSTAT's databank CRONOS. Almindeligvis går tallene tilbage til 1960, og kan oplyses på anmodning.

Denne publikation indeholder kun et yderst minimalt antal metodologiske bemærkninger. Oplysninger om definitioner, metoder, fællesskabstilpasninger og kilder for hver enkelt række vil blive givet i en specialudgave af »EUROSTATISTIK«, hvori de statistiske angivelser definitioner, metoder, tilpasninger og kilder vil blive beskrevet.

Der udkommer to udgaver af »EUROSTATISTIK« hver måned. Den ene affattet på dansk, engelsk og italiensk leveres til trykning den fjerde tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Den anden affattet på tysk, fransk og nederlandsk leveres til trykning den anden tirsdag hver måned, og vil kunne fås i hovedstæderne den følgende mandag. Hver udgave indeholder de mest aktuelle tal til disposition den dag leveringen til trykning finder sted.

PREFACE

EN

This bulletin is in two parts : 'Community Tables' and 'Country Tables'.

The Community Tables contain the main indicators useful for following short-term economic developments in the Community as a whole and in the Member States, supplemented by a certain amount of structural data relating to 1975. This part of the bulletin is intended to make possible real comparisons between countries and therefore only contains data which has been harmonized by EUROSTAT on the basis of common criteria, this explains many of the differences from national series.

Seasonal adjustment of the series has been done with EUROSTAT's own method, 'Dainties'. **The most recent data are provisional and in some cases estimated by EUROSTAT.**

Finally the Community Tables include a column for the USA as an indicator of changes in the world economy.

The Country Tables contain a selection of the economic indicators most often used in each country. They are national series based on

the definitions of the country concerned and seasonally adjusted by the country. In addition to the nine Community countries this section includes the three candidate countries (Spain, Greece and Portugal) the USA and Japan.

For all series, historical data (annual, quarterly or monthly) is available in EUROSTAT's CRONOS data bank, going back in most cases to 1960. This can be supplied on request.

This publication contains the absolute minimum of methodological notes. Details of definitions, methods, Community adjustments and sources of each series will be given in a special edition of 'Eurostatistics'.

Two versions of 'EUROSTATISTICS' come out every month. The first in Danish, English and Italian goes to the printers the fourth Tuesday of the month and will be distributed in the national capitals the following Monday. The second in German, French and Dutch goes to the printers the second Tuesday of the month and will be distributed in the national capitals the following Monday. Each version will contain the latest figures available when it went to press.

AVVERTENZA

IT

Il presente bollettino consta di 2 parti : l'una ha per oggetto alcune « tavole comunitarie », l'altra riguarda alcune « tavole per paese ».

Nelle tavole « comunitarie » si trovano riuniti i principali indicatori che consentono di seguire l'evoluzione di breve periodo dell'economia comunitaria nel suo complesso e in ogni singolo Stato membro, completati da alcuni dati strutturali relativi al 1975. Questa parte, che si prefigge di consentire di stabilire confronti reali fra paesi, contiene soltanto dati armonizzati dall'EUROSTAT in base a criteri comuni, il che spiega l'esistenza di certe differenze rispetto ai dati nazionali.

Le variazioni stagionali delle serie sono eliminate con il metodo « Dainties » dell'EUROSTAT. **I dati più recenti sono provvisori e, a volte direttamente stimati da EUROSTAT.**

Nelle tavole comunitarie figura una colonna relativa agli Stati Uniti d'America a titolo di indicatore dell'evoluzione della congiuntura mondiale.

Nelle « tavole per paesi » si riporta una selezione degli indicatori congiunturali più correntemente adoperati in ogni paese; si tratta di serie nazionali, corrispondenti ai criteri nazionali e « destagionaliz-

zate » per mezzo dei metodi nazionali. In questa parte sono presi in considerazione oltre ai 9 paesi membri della Comunità, i paesi candidati all'adesione: Grecia, Portogallo, Spagna, nonché gli Stati Uniti d'America e il Giappone.

Per tutte le serie, presso il sistema CRONOS dell'EUROSTAT sono disponibili dati storici (annui, trimestrali o mensili) risalenti in generale al 1960, i quali possono essere forniti su richiesta.

La presente pubblicazione contiene soltanto annotazioni metodologiche ridotte allo stretto minimo. Le informazioni relative alle definizioni, ai metodi, agli aggiornamenti comunitari e alle fonti di ogni serie saranno riportate in un fascicolo speciale (ad hoc) di EUROSTATISTICHE avente per oggetto le definizioni, i metodi, gli aggiornamenti e le fonti dei dati statistici.

Ogni mese vengono pubblicate due versioni di « EUROSTATISTICHE ». La prima redatta in danese, inglese e italiano, che va in stampa il 4° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo; la seconda redatta in tedesco, francese e olandese, che va in stampa il 2° martedì di ogni mese, sarà diffusa nelle capitali il lunedì successivo. Ogni versione riporta le ultime cifre disponibili il giorno della stampa

ARTICLE

A comparison of the sector financial accounts of six of the member countries of the European Community

JUST PUBLISHED

- (1) More detailed data by branch appear in 'Industrial Short-term Trends'.
- (2) The data included in this section of the bulletin are results from a short-term trends enquiry conducted among heads of enterprises in the Community. More detailed data appear in 'European Economy'.
- (3) More detailed data on external trade, expressed in EUA appear in the 'Monthly External Trade Bulletin'.
- (4) Final consumption.

DI RECENTE PUBBLICAZIONE

90

- (1) Alcuni dati più dettagliati per branca sono riportati nel bollettino « Indicatori congiunturali dell'industria ».
- (2) I dati contenuti in questa parte del bollettino rappresentano i risultati dell'indagine sulla congiuntura presso i capi di impresa delle Comunità. Alcuni dati più particolari figurano in « Economia europea ».
- (3) Alcuni dati del commercio estero più dettagliati ed espressi in UCE sono riportati nel « Bollettino mensile del commercio estero ».
- (4) Eonsumi finali delle famiglie.

DE

Die deutsche Fassung dieses Bulletins wird am zweiten Dienstag jeden Monats in Druck gegeben.

FR

La version française de ce bulletin est mise sous presse le second mardi de chaque mois.

NL

De Nederlandse versie van dit bulletin gaat de tweede dinsdag van elke maand ter perse.

A COMPARISON OF THE SECTOR FINANCIAL ACCOUNTS OF SIX OF THE MEMBER COUNTRIES OF THE EUROPEAN COMMUNITY

1. INTRODUCTION

The sector financial accounts to be found in the Eurostat National Accounts ESA Yearbook give a detailed statement of the flow of funds within and between the main sectors of the economy. In other words, they cover the net borrowing, net lending and net purchases of securities of the sectors. Plainly they are of importance for analysing how financial markets work, and extensive use is already made of such data by investment analysts concerned to forecast future demand and supply of bonds and shares. Equally, national economic forecasters now use flow-of-funds data in their analysis of monetary policy and its interaction with the 'real' economy.

Much of the theorizing on the flow of funds is concerned with the adjustment of actual to desired portfolios of assets. For instance, it could be hypothesized that households in aggregate aim to keep the level of their liquid assets, and in particular their transferable sight deposits with banks, a constant proportion of their expenditure. Increases in households' holdings of these assets would be particularly responsive to the rate of price inflation, in a way that, perhaps, their holdings of long-term bonds would not. It follows that a complete explanation of flows of funds by type of asset requires data on stocks of assets. Unfortunately, comprehensive sectoral balance sheets are rarely available at present, though progress is being made in several countries. Much, however, can be achieved by a careful interpretation of the flow of figures.

2. THE CLASSIFICATION OF THE DATA

The sector financial accounts are classified according to the European System of Accounts (ESA), which was drawn up by Eurostat in consultation with the Member States of the Community. The ESA sets out to provide a systematic, comparable, and as far as possible, complete picture of the economic activity within each member country. Table 1 describes the main sectors used in the classification. For full details, the reader is referred to the ESA manual (second edition, 1978).

The ways that member countries construct their sector financial accounts have certain features in common. Statistics supplied by credit institutions play a central role, because of the sector's importance as a financial intermediary. In most countries the majority of the sector has to supply detailed statistics for the purposes of monetary policy and banking regulation and these have been extended and adapted so that sector financial accounts can be established, not only for this sector but also for others. Direct statistical reporting is also the main source for the financial accounts of the insurance enterprises and general government sectors, though some countries experience less than complete coverage of autonomous pension funds and local government. The absence of direct statistical reporting is the rule rather than the exception for the remaining three domestic sectors. The units of the non-financial corporate and quasi-corporate enterprises sector (which includes nationalized industries as well as private firms) publish annual reports and accounts, but their detail is not homogeneous and neither is the timing of accounting periods. For these reasons heavy reliance is placed on the records of the three sectors with fairly comprehensive statistical reporting, and, in particular, on banking statistics to establish the sector's financial accounts. Stock Exchange information is also used. Most countries cannot, as yet, separate the financial accounts of the households sector and the private non-profit institutions sector, and in this article they are treated together.

The accounts of the rest of the world sector provide an overall view of the economic relationships linking the national economy with the other economies. The counterparts of transactions recorded in other sectors are used to derive its financial accounts. Transactions between units of the same sector are not recorded for corporate enterprises and households, and so data on total trade credit extended is not available. Whereas, of necessity, most of the data for these two sectors is consolidated, the data which is examined in this article for the credit institutions, insurance enterprises and general government sectors is in general non-consolidated.

The ESA classification of types of financial asset is distinguished by the fact that it relates only to the nature of the asset and not to the sector whose asset or liability it is. The aim is to make it easier to aggregate similar sorts of asset in a systematic manner. The financial accounts are based on a double entry bookkeeping system and a consequence of this is that for each type of financial asset, the total change in assets summed over all creditor sectors equals the total change in liabilities summed over all debtor sectors. The ESA differentiates around thirty different types of financial asset. Table 2 lists the ten main headings which are used in this note.

3. COMPARISON OF THE SECTOR FINANCIAL ACCOUNTS 1970-77

3.1. An overall view

The most recent Eurostat National Accounts ESA Yearbook (Detailed tables 1970-77, in two volumes) gives sector financial accounts for Germany, France, Italy, the Netherlands, Belgium (only to 1976), and the UK. Data for Luxembourg, Ireland and Denmark is currently not available. This article presents a structural analysis of the financial accounts for this period using percentage breakdowns and correlation coefficients. It is not very illuminating simply to convert the accounts to EUA because magnitudes of flows differ considerably between countries. Only transactions with the rest of the world are worth comparing in this way.

Table 3 gives the percentage breakdown by type of asset of changes in assets over the period 1974-77 for each sector and country. Table 4 gives the corresponding figures for changes in liabilities. These tables shed no direct light on the pattern of lending between one sector and another. Eurostat receives and publishes some data giving certain financial flows between creditor and debtor sectors. However its coverage is too incomplete to provide full comparative tables of intersectoral flows for all the six countries. Table 5 attempts to get round this difficulty. For each of the six countries, the changes in assets of one sector have been correlated with the changes in liabilities of other sectors using eight years' data and the breakdown into ten types of asset, eighty observations in all. A correlation coefficient near zero would imply a poor linear fit, and, in this case, a high correlation coefficient (i.e. close to one) can be taken as grounds for suspecting that there are significant flows between the two sectors, and for investigating further. Of course, a high coefficient could be coincidental if the types of assets used by two sectors matched, but nevertheless the flows between them were negligible. This is less likely with the level of aggregation used here. Another problem can occur when one sector is an important source of funds for another sector but the second sector is only a minor use of funds for the first sector, or vice versa. If the second sector has a very specialized borrowing pattern which is very unlike the lending pattern of the first sector, the correlation coefficient will be low. This is only likely to be a problem for the insurance enterprises sector.

With regard to the total balance of net changes in assets and liabilities for the

reference period 1970-77, four out of the six sectors show a clear common pattern across countries. The combined sector S80 + S70, which mainly consists of households, is a large net saver. The non-financial corporate enterprises sector, S10, is a large net borrower because of the capital investment that it carries out. The general government sector, S60, has also been a net borrower over the period, especially since the onset of the world recession. This has been true even for France, whose general government sector was a net lender up until 1974. The behaviour of the rest of the world sector, S90, reflects each country's performance on the current account of the balance of payments. Germany, the Netherlands and Belgium ran surpluses in most of the years 1970-77 and the counterpart was increasing net liabilities of the rest of the world sector. The credit institutions sector, S40, was on balance a net lender in Germany, Italy, the Netherlands and the UK, as might be expected for a sector which is a financial intermediary and which normally carries out only a relatively small amount of capital investment.

3.2. Households and private non-profit institutions

Of the individual sectors, S80 + S70 (households etc.) exhibits the greatest similarity between countries in its lending and borrowing behaviour. Table 5 and other evidence suggest that credit institutions and insurance enterprises are the main recipients of households' savings, and that credit institutions are the main source of loans. In all the countries for which there are data (the Netherlands and Belgium do not produce separate financial accounts for non-financial corporate enterprises and households), households channel a significant proportion of their savings into liquid assets (currency and transferable sight deposits and other deposits). It is interesting to note that in the low inflation countries, Germany, the Netherlands and Belgium, a smaller proportion of the net increase of households' assets was directed into currency and transferable sight deposits compared with the other countries. This is what would be predicted by the portfolio adjustment theory mentioned earlier. Households in the UK save comparatively heavily with insurance enterprises, due to tax concessions attached to this form of saving. The sector's holdings of long-term bonds and shares have also tended to increase, though households in the UK have been net sellers of shares.

3.3. Non-fin. ncial corporate and quasi-corporate enterprises

The non-financial corporate enterprises sector, S10, is on balance a net borrower by means of long-term loans, short-term loans and shares and other equities. Long-term loans were particularly important in Germany and short-term loans were relatively small. The converse was true for Italy. Negotiable securities accounted for over 40% of the increase in liabilities for Belgium and were also significant in France and Italy (see Table 4). Generally credit institutions are the main suppliers of funds, with general government being an important source for public enterprises. The bulk of changes in assets of the corporate enterprises sector have been in the form of transferable sight deposits and other deposits (with credit institutions) and loans (mainly to the rest of the world in most countries).

3.4. Credit institutions

The credit institutions sector, S40, of which banks form the major part, accepts liabilities in the form of deposits and lends by way of loans. Currency and transferable sight deposits account for a comparatively small proportion of changes in liabilities for Germany, the Netherlands, the UK and France. Other types of financial instrument were relatively little used as a source of funds except in Germany where long-term bonds accounted for 23% of the sector's increase in liabilities and the counterpart to this was the higher proportion of long-term loans in the sector's lending compared to the other countries. In France and the Netherlands, long-term loans also formed a high proportion of the sector's lending, whereas in the UK short-term loans were much more important. In Italy, net purchases of bills and bonds formed over 40% of the sector's total increase in assets, whilst lending by means of long-term loans was relatively low. The credit institutions sector, being the key financial intermediary, receives funds from all the other sectors and lends to all of them. Households and corporate enterprises are generally the main sources of funds to the sector, though the rest of the world sector is also important, especially to the UK, since London is a major international financial centre. Over the period 1970-77, UK banks attracted short-term deposits of about 106 000 million EUA from the rest of the world, by far the largest increase of any EC member country. French banks attracted 45 000 million EUA and Italian banks 20 000 million over the same period. Somewhat surprisingly, German banks attracted only 14 000 million EUA. In the case of Italy, 30% of short-term borrowing from abroad was channelled into the domestic economy, whereas the corresponding figure was only 5% for the UK. Corporate enterprises are usually the largest borrowers from the sector, and then households.

3.5. Insurance enterprises

The insurance enterprises sector shows great homogeneity between countries in the composition of its changes in liabilities, which are mainly in the form of insurance technical reserves owned by households. In Italy, borrowing by means of short-term loans is also significant. There is much more diversity in the composition of the sector's lending and investment. In Germany, France, Belgium and the UK, the sector invested heavily in long-term bonds. In Italy and the Netherlands, on the other hand, negotiable securities were a fairly small proportion of the sector's investment, and loans were much more important. Loans were also important in Germany and Belgium. In France and the UK, net purchases of shares were significant, and in Germany, deposits with credit institutions. With regard to the sectoral breakdown of lending, general government and corporate enterprises are the main recipients of the sector's funds in most countries.

3.6. General government

The financial accounts of the general government sector, S60, varied more between countries than other domestic sectors did. This is hardly surprising given the institutional differences. For example, the Issue Department of the Bank of England is included in the general government sector for the time being. Also the varying importance of the rest of the public sector, and the diversity of ways of financing it, influences the amount of lending that the

sector undertakes. In most countries general government was a net borrower by means of long-term bonds and a net purchaser of shares and other equities. A great deal of the sector's external borrowing is from credit institutions and insurance enterprises. In Germany and the Netherlands, long-term loans and long-term bonds are the main financial instruments used, whereas in Belgium and the UK, general government does not borrow on a large scale directly from banks but issues mainly long-term bonds.

3.7. The rest of the world

The breakdown by type of asset for the rest of the world sector, S90, shows no strong common pattern between countries.

3.8. Further comparisons between countries

Finally, this article attempts to sum up which countries appear to be most similar to each other, in terms of the types of assets used in borrowing and lending. Table 6 gives the correlation coefficients between pairs of countries, separately for changes in assets and changes in liabilities, firstly for all the domestic sectors taken together and then for sectors S40, S50 and S60. The data used are that of the percentage breakdown by type of asset, as given in Tables 3 and 4. These tables relate to the sub-period 1974-77, and the calculations have also been carried out on the corresponding breakdown for the sub-period 1970-73. Types of asset in which no financial transactions took place in any country (for a given sector) were eliminated from the observations. Generally, the breakdown of borrowing by type of asset was highly correlated between all the countries, whereas the breakdown of changes in lending (i.e. either directly or by purchases of securities) was much less so. Credit institutions in Germany, France and the Netherlands all have a very similar pattern of lending, as do French and UK insurance enterprises. The general government sectors in Italy, the Netherlands and the UK on the one hand, and France and Belgium on the other also use the same types of instruments for lending. However, there are no pairs of countries with a similar pattern for all sectors together. Overall, the correlations for the period 1974-77 tended to be slightly higher than for 1970-73. Though this could have been due to a genuine convergence in financial structures, it could equally be attributable to improvements in data collection as the countries continued to make their statistics more comparable within the framework of the ESA.

Table 1 — The main ESA sectors

Formal title	Code	Examples
Non-financial corporate and quasi-corporate enterprises	S10	Non-financial companies, public corporations, cooperatives, partnerships
Households	S80	Households and certain small businesses
Private non-profit institutions serving households	S70	Churches, charities, trade unions
Credit institutions	S40	The central bank, commercial banks, savings banks, investment companies
Insurance enterprises	S50	Insurance companies
General government	S60	Central government, local government, social security funds
Rest of the world	S90	Non-resident units

Table 2 — The main types of asset in the ESA classification

Formal title	Code	Examples
Financial gold	F00	
Special drawing rights	F10	
Currency and transferable sight deposits	F20	Notes and coin, transferable sight deposits, in both national currency and foreign currency. The net position in the IMF is also included
Other deposits	F30	Time deposits, savings deposits, in both national currency and foreign currency
Bills and short-term bonds	F40	Treasury bills, negotiable deposit certificates
Long-term bonds	F50	Fixed interest securities with an initial maturity of several years
Shares and other equities	F60	Shares, investments by general government in the capital of public enterprises
Short-term loans	F70	Bank advances, short-term trade credit, accounts receivable and payable
Medium- and long-term loans	F80	Loans for house purchase, long-term bank loans to companies, medium- and long-term trade credit
Insurance technical reserves	F90	Actuarial reserves against outstanding risks, prepayments of premiums, reserves for with-profits insurance, reserves against unsettled claims

Et udvalg af Fællesskabets vigtigste statistikker og sammenligninger med en række andre europæiske lande, De forende Stater, Japan og Sovjetunionen.

Dette udvalg dækker følgende emner :

- Befolkning
 - Arbejdskraft
 - Forskning og uddannelse
 - Nationalregnskaber
 - Landbrug
 - Energi
 - Industri
 - Trafik
 - Udenrigshandel
 - Priser
 - Løn og arbejdstid
 - Sociale regnskaber
 - Levestandard
 - Finanser
 - Regionalbefolkning og -bruttonatinalproduktet
